

Denmark's EE obligations

Paris Agreement

Reduction of CO2 emissions by 70 % in 2030

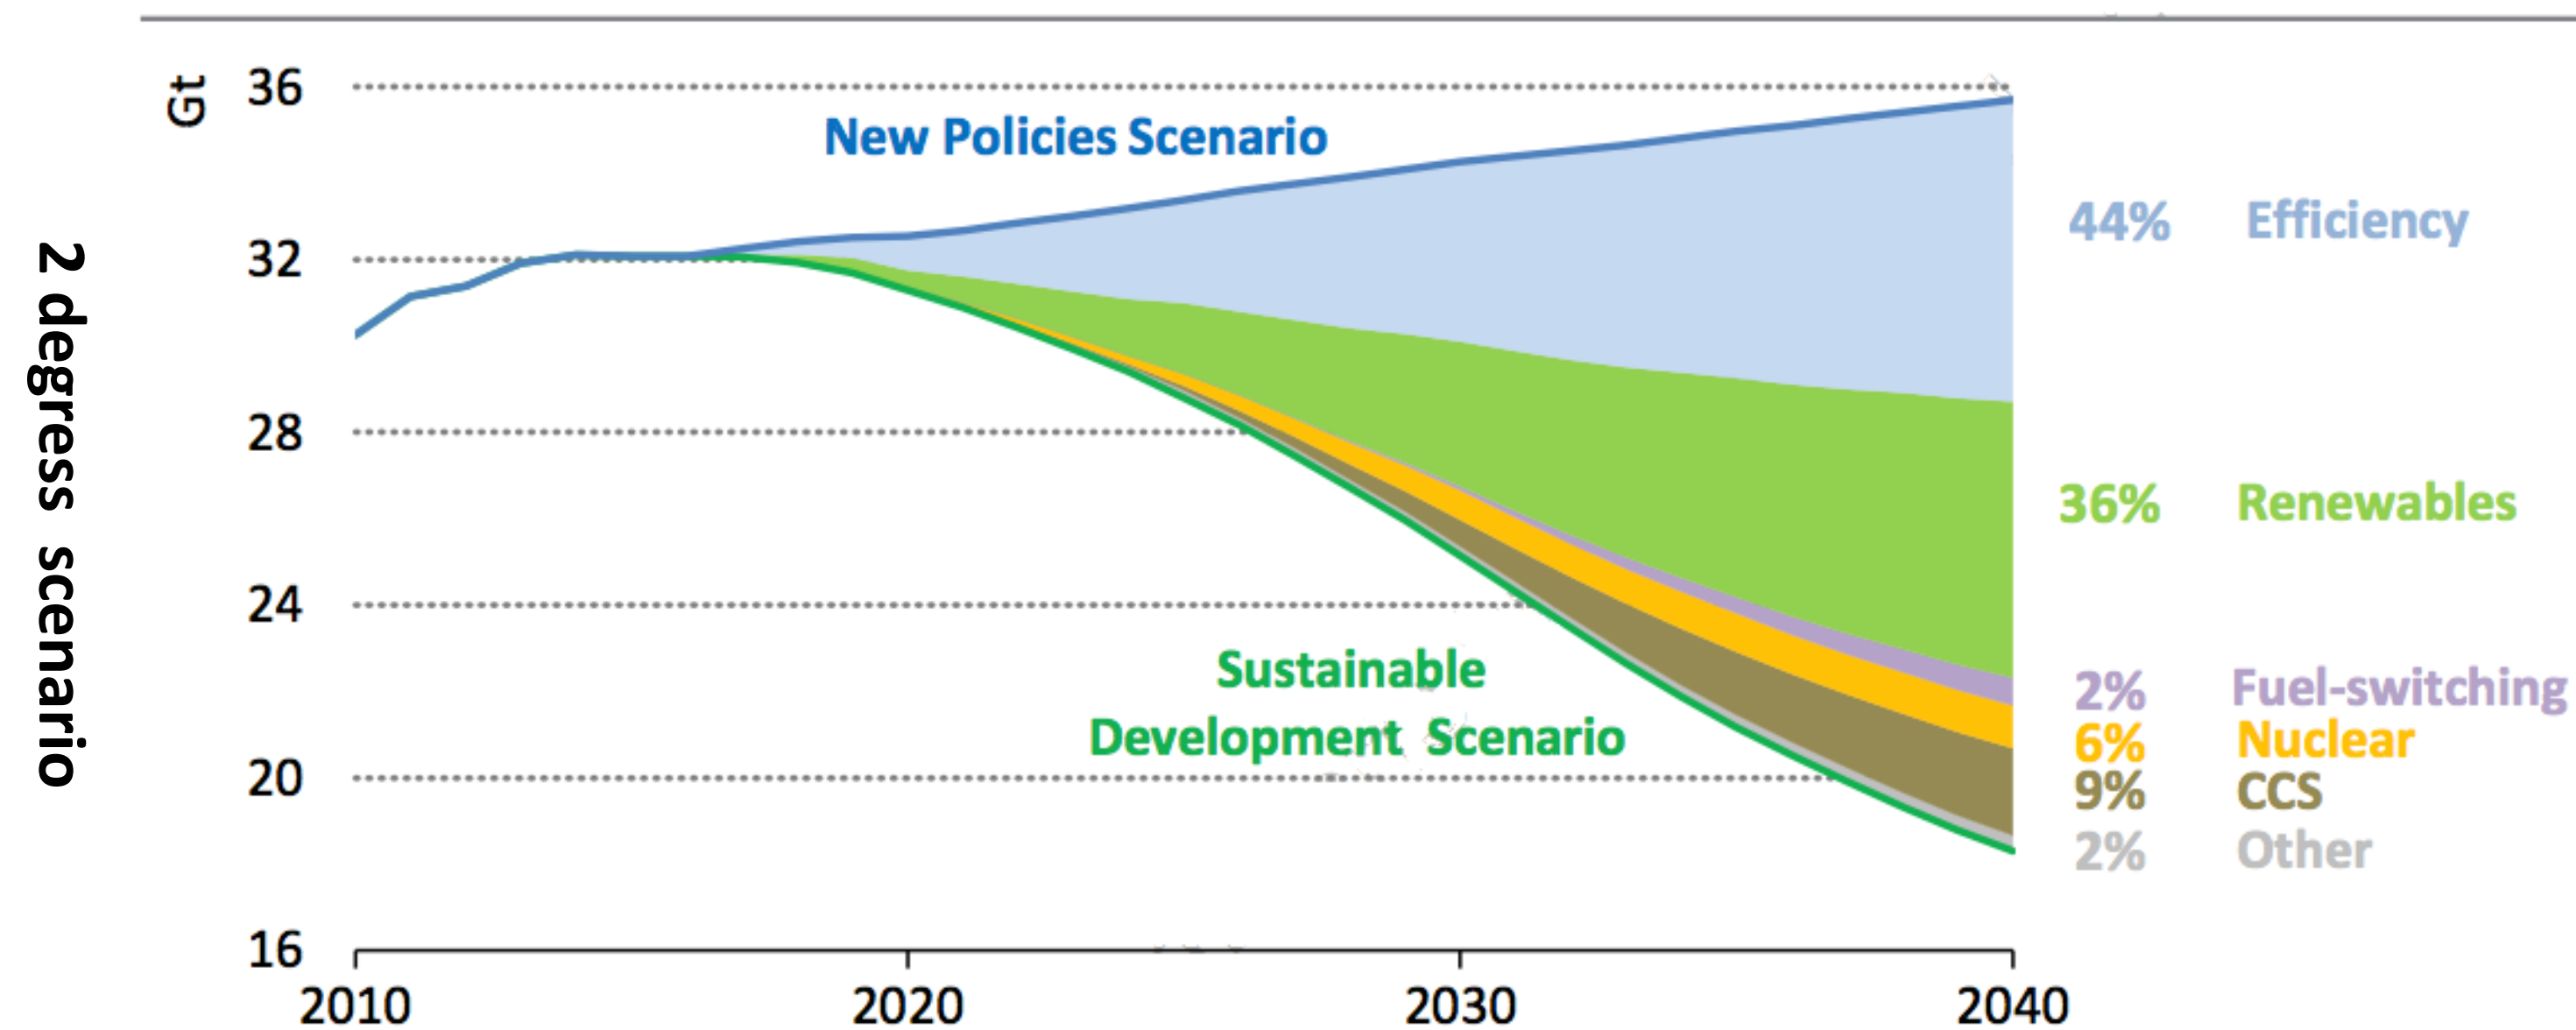

Energy efficiency target on 32.5% in EU

**Energy savings obligation: Annually 0.8% savings of final energy consumption.
3% yearly energy renovation rate for public buildings.**

We need both energy efficiency and renewables measures to reach Paris Agreement

Figure 3.15 ▷ Global CO₂ emissions reductions in the New Policies and Sustainable Development Scenarios

Reference: IEA World Energy Outlook, 2017.

Social housing sector

- 20 % lives in social housing in Denmark, almost 600t dwellings
- Huge renovation need towards 2040
- New political agreement: 30 bn DKK for energy renovation of the social housing sector
- Public guarantee and private investors to ensure even more energy renovation projects

- **Current renovation need: 70 bn DKK**
- **7 out of 10 buildings owned by municipalities are not healthy, nor energy efficient.**

Expected investments and job creation

YEARLY INVESTMENTS

21.000 US DOLLARS TOWARDS 2040

JOB CREATION

22 MILLION IN 2050
